GENERAL NOTES

All setting out must be checked on site
 All levels must be checked on site
 All fixings and weathervings must be checked on site
 All dimensions must be checked on site
 This drawing must not be scaled, contractor must check and verify all dimensions on site and report any discrepancies in writing to Studio Eto Design Services before proceeding work
 This drawing must be read in conjunction with all other relevant drawings, specification clauses
 This drawing must not be used for land transfer purposes
 This drawing does not represent a structural drawing in any way
 This drawing must not be used on site unless issued for construction
 Subject to survey, consultation and approval from all statutory authorities

Area Measurement:
 The areas are approximate and can only be verified by a detailed dimensional survey of the completed building. Any decisions to be made on the basis of these predictions, whether as to project viability, pre-letting, lease agreements or the like, should include due allowance for the increases and decreases inherent in the design development and building processes.
 Figures relate to the likely areas of the building at the current state of the design and using the Gross External Area (GEA) / Gross Internal Area (GIA) / Net Internal Area (NIA) method of measurement from the Code of Measuring Practice, 6th Edition (RICS Code of Practice).
 All areas are subject to Town Planning and Conservation Area Consent, and detailed Rights to Light analysis.
